EDUCATION

University of Florida

Gainesville, FL

Bachelor of Science in Computer Science

Aug. 2024 – May 2028

- Relevant Coursework: Data Structures & Algorithms, Discrete Structures, Computer Organization, Software Engineering

EXPERIENCE

Clubfinity - UF Software Engineer Club

Gainesville, FL

Software Developer

Sept 2025 – Present

- Collaborated with a 15-member development team to build an internal MERN stack platform managing workshops and resources for 150+ members.
- Developed RESTful APIs to optimize data retrieval, enabling complex filtering and implementing role-based access control to restrict edits.
- Integrated secure bcrypt-based authentication and session management to ensure data integrity across authenticated users.
- Engineered a modular backend structure, isolating API routing, business logic, and data persistence to ensure long-term scalability and code maintainability.

PROJECTS

GameMate | *Java, Spring Boot, React, Next.js, PostgreSQL*

- Architected a full-stack gamer matchmaking platform that connects users based on shared games and playstyles
- Optimized a PostgreSQL database of 10,000+ records for user profiles and chat data, improving query speed and reliability.
- Handled 100+ concurrent requests with a scalable Spring Boot backend, secured via JWT authentication and Bcrypt password encryption.
- Built a responsive frontend with Next.js and Tailwind CSS, achieving sub-second page load times through server-side rendering and optimized data fetching.

BrushUp | *PyTorch, Hugging Face, Flask, SQLAlchemy, React*

- Created a Generative AI drawing app that produces custom art references utilizing Latent Diffusion Models and Transformers.
- Designed and maintained a relational SQLite database with 1,000+ records using SQLAlchemy and Flask-Migrate, reducing asset retrieval time by 40% and enabling seamless schema updates.
- Engineered a low-latency AI pipeline using Hugging Face tools, leveraging Accelerate to optimize Stable Diffusion performance on Apple M1 GPUs, achieving an 80% reduction in generation time.

TECHNICAL SKILLS

Languages: Java, Python, C++, TypeScript, JavaScript, SQL, HTML, CSS

Frameworks & Libraries: Spring Boot, Flask, FastAPI, React, React Native, Next.js, Node.js, Express.js, PyTorch, Tailwind CSS

Tools & Platforms: PostgreSQL, Firebase, GCP, AWS, Git, Docker, MongoDB

Other: Bilingual in English and French

INVOLVEMENT

Software Engineer Club | *Workshop Lead*

Aug 2024 – Present

- Designed hands-on exercises and delivered a Splunk workshop to 50+ members, strengthening their skills in analyzing and visualizing machine data.
- Taught a FastAPI workshop integrating Gemini API function calling and OpenWeather API, enabling members to build intelligent, real-time applications.
- Collaborated with club officers to plan technical events, increasing member engagement and participation.
- Oversaw a LeetCode tournament with a \$1,000 prize, ensuring a fair and competitive environment for participants.
