## EDUCATION

### University of Florida

*Bachelor of Science in Computer Science*

Gainesville, FL

*Aug. 2024 – May 2028*

- Relevant Coursework: Data Structures & Algorithms, Discrete Structures, Computer Organization, Software Engineering, Computational Linear Algebra

## EXPERIENCE

### Mobile Developer

Feb 2025 – June 2025

*Courselynx*

*Remote*

- Developed a real-time, media-sharing academic chat application using React Native and TypeScript, collaborating with a small team and applying software engineering principles.
- Leveraged Expo Go for rapid testing of real-time changes and collaborated on UI/UX through Figma to align designs with functionality.
- Integrated image and video previews into the chat system, improving the user experience and boosting media sharing engagement by 20%.

## PROJECTS

### BrushUp | *PyTorch, Hugging Face, Flask, SQLAlchemy, React*

- Developed an AI-powered drawing application with React, enabling users to generate custom artistic references through Stable Diffusion and Transformers.
- Engineered secure authentication and managed a relational database with over 1,000 records, implementing efficient asset management via Flask, SQLAlchemy, and Bcrypt.
- Optimized GPU-accelerated machine learning inference on Apple M1 chips using PyTorch Accelerate, reducing generation time by 80% and enabling near real-time AI image creation.

### GameMate | *Java, Spring Boot, React, Next.js, PostgreSQL*

- Built a full-stack gamer matchmaking platform with a Tinder-style swiping interface, connecting players based on shared games and playstyles.
- Handled 100+ concurrent requests with a scalable Spring Boot backend, secured via JWT authentication and Bcrypt password encryption.
- Designed a responsive frontend with Next.js and Tailwind CSS, achieving sub-second page load times with server-side rendering and optimized data fetching.
- Developed a weighted scoring algorithm to efficiently match users, while managing a PostgreSQL database to support profiles and messaging history.

## TECHNICAL SKILLS

**Languages:** Java, Python, C++, TypeScript, JavaScript, SQL, HTML, CSS

**Frameworks & Libraries:** Spring Boot, Flask, FastAPI, React, React Native, Next.js, Node.js, Express.js, PyTorch, Tailwind CSS

**Tools & Platforms:** PostgreSQL, Firebase, GCP, Git, Docker

**Other:** Bilingual in English and French

## INVOLVEMENT

### Software Engineer Club | *Workshop Lead*

Aug 2024 – Present

- Designed hands-on exercises and delivered a Splunk workshop to 25+ members, strengthening their skills in analyzing and visualizing machine data.
- Developed clear learning resources and guided members through a step-by-step project, helping them translate concepts into practical technical skills.
- Collaborated with club officers to plan technical events, increasing member engagement and participation.
- Oversaw a LeetCode tournament with a \$1,000 prize, ensuring a fair and competitive environment for participants.
