EDUCATION

University of Florida

Gainesville, FL

Bachelor of Science in Computer Science

Expected Graduation: May 2028

- Relevant Coursework: Data Structures and Algorithms, Operating Systems, Software Engineering

EXPERIENCE

IBM

Brookhaven, GA

Customer Success Engineer Co-op

August 2026 – Present

- Engineer and deploy software MVPs and AI prototypes to address complex enterprise technical specifications
- Analyze client infrastructure and design system architectures, evaluating technical trade-offs, scalability, and integration constraints

Consumers Energy

Jackson, MI

Software Engineering Intern

May 2026 – August 2026

- Engineered an Update Permit Review feature in C# for an internal application used by 12 permit coordinators and their teams, implementing CQRS command handlers to support permit data changes
- Developed C# REST APIs with Entity Framework and SQL Server to support worksheet management, enabling users to retrieve previous submissions and autofill new worksheets, reducing manual data entry by 90%
- Improved code reliability by developing unit tests with Jest and xUnit, applying TDD principles and leveraging mocks across application components
- Implemented TypeScript regex parsing logic to extract structured dates and messages from SQL Server comment strings, enabling consistent UI rendering

Clubfinity - UF Software Engineer Club

Gainesville, FL

Software Developer

September 2025 – Present

- Collaborated in a 15-member Agile team to build a MERN web app managing workshops for 150+ members
- Implemented bcrypt password hashing for secure user registration and authentication workflows
- Engineered a modular backend isolating routing, business logic, and data persistence to ensure scalability and maintainability

PROJECTS

Learn2Code | *Java, Spring Boot, React, Next.js, PostgreSQL, Docker*

- Architected a full-stack learning platform enabling interactive coding practice and real-time user progress tracking
- Developed a secure Spring Boot backend with Spring Security and bcrypt hashing for user data protection
- Engineered a Dockerized PostgreSQL backend sustaining approximately 92 requests/sec with a 0% failure rate under Grafana k6 testing
- Designed a real-time chat architecture using STOMP over WebSockets, sustaining stable bidirectional messaging under 1,000 concurrent users

BrushUp | *PyTorch, Hugging Face, Flask, SQLAlchemy, React*

- Created a generative AI drawing app producing custom art references using a Latent Diffusion Model
- Managed a relational SQLite database with SQLAlchemy and Flask-Migrate for efficient data storage and retrieval
- Improved AI inference performance by 80% through latency reduction using PyTorch MPS backend and Float16 precision

TECHNICAL SKILLS

Languages: Python, Java, C#, C++, JavaScript, TypeScript, SQL, HTML, CSS

Frameworks & Libraries: Spring Boot, Flask, FastAPI, Node.js, Express.js, React, Next.js, PyTorch, Tailwind CSS

Tools: PostgreSQL, SQL Server, MongoDB, Docker, Azure, GCP, Git, GitHub Copilot, Figma

INVOLVEMENT

Software Engineer Club | *Workshop Lead*

August 2024 – Present

- Delivered workshops on Splunk and FastAPI with Gemini AI function-calling integration to 50+ members
- Oversaw a LeetCode tournament with a \$1,000 prize, ensuring a fair and competitive environment for participants
